

August 31, 2010

Dear Pharmacy Students,

Course coordinators have been asked to clearly state if old exams can be accessed by pharmacy students in their preparation for examinations during the semester. Please pay attention to this informative item in your course syllabi. Course coordinators have different perspectives or approaches to the use of old examinations in their courses. If you have a question about this issue, consult the course syllabus or communicate with the course coordinator.

The lists below are not inclusive of all pharmacy courses offered.

To date, the following courses allow access to old exams:

Fundamentals of Medicinal Chemistry  
Structure and Function of Nucleotides  
Medicinal Chemistry I  
Medicinal Chemistry II  
Introduction to Principles of Pharmacology  
Dose Optimization I  
Dose Optimization II  
Pharmacology I  
Pharmacology II  
Introduction to Quantitative Methods  
Dosage Forms and Contemporary Pharmacy Practice  
Drug Therapy Monitoring and Pharmacogenomics

To date, the following course do not allow access to old exams:

Clinical Biochemistry  
Dosage Forms I  
Dosage Forms II  
Physiological Basis of Disease I  
Physiological Basis of Disease II  
Professional Communications  
Women's Health Issues  
Herbal Medicines  
Critical Appraisal of Pharmacoeconomic Studies
